[Rajesh Dammala - Platform Monitoring Engineer / Incident Manager](#)

Professional Summary

Lead Escalations and Incident Management leader with 14+ years of Microsoft platform operations experience, including ownership of mission-critical support systems with 100% SLA compliance. Expert in platform monitoring, incident command, customer communication, and problem management with proven impact: operational efficiency improved from 85% to 98%, 25,000+ stale/false incidents removed, and 32% reduction in issue resolution time.

Core Competencies

- Incident command and major incident coordination
- Platform monitoring operations and alert quality engineering
- Problem management with trend analysis and preventative actions
- Telemetry, observability dashboards, and executive communication
- Automation and scalable detection workflows

Selected Impact

- Operational ownership across 20+ mission-critical support services
- Removed 25,000+ stale/false incidents and optimized 500+ alerts
- Delivered 30-35% automated incident resolution via Azure SRE Agent
- Authored 175+ troubleshooting guides and playbooks in 5 months

Experience
